795 Blade^{RS}

**The new 795 Blade^{RS}
offers you the ultimate
high-performance
experience.**

Fast. Everywhere

If there were to be just one bike, this would be it. The ultimate racing machine, the fastest bike to ever come out of our workshops. The 795 Blade^{RS} was designed to win, and it answered its calling on its very first UCI World Tour outings in the hands of the male and female COFIDIS team riders. Its incredible performance pedigree is the result of meticulous development, carried out hand-in-hand with our professional riders, to find the perfect carbon layup and geometry to cross the line first, no matter the race profile or location. Light, aerodynamic and stiff, the 795 Blade^{RS} seamlessly blends technology with expertise, bringing you the unique riding feel that only a pure racing machine can.

Powerfully light

Does choosing mean sacrificing? Not in this case. A bike like the 795 Blade^{RS} simply means refusing to compromise on either aerodynamics or weight, versatility or responsiveness. For this machine does not compromise, it simply demands meticulous development and a new generation of components to achieve one goal: a fully-built, race-ready bike weighing just 7 kg, with proven dynamic qualities for all types of courses and riders no matter if you are a climber, a rouleur or a sprinter. The 795 Blade^{RS} is a masterpiece of technology, a featherweight bundle of energy just waiting to be released.

Features

Frame	905g (M)
Fork	425g
Seatpost	160g
Stem	140g
H-Bar	220g
Bike (Size M / Dura ace groupset / Corima MCC EVO wheels)	7,0g

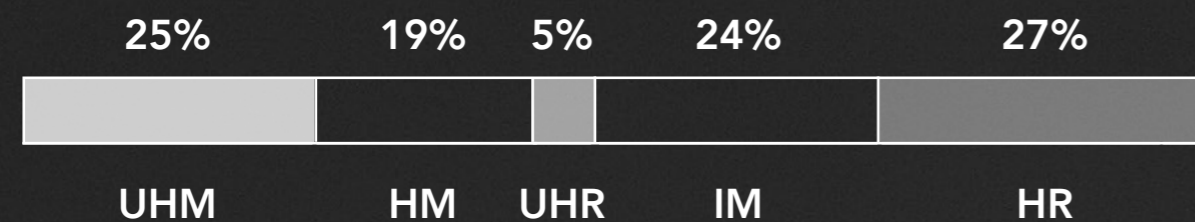

As sharp... as a blade

Wind? What wind? The 795 Blade^{RS} is born to slice through the air. With painstaking wind tunnel testing on the frame and component, the bike is the most worthy ambassador of LOOK Cycle's aerodynamic expertise, born from years of road and track cycling experience. Each tube section is specifically-shaped to reduce drag and optimize handling precision. Every detail counts when it comes to integration; from the integrated seatpost to the placement of the water bottles, the sharp lines and streamlined design serve the ultimate goal of ultra-high performance.

Carbon core

A LOOK Cycle carbon frame. Words that instantly conjure the image of a masterpiece of precision engineering... and yet the 795 Blade^{RS} goes a step further to offer absolute perfection. The frame is built using a special carbon fiber blend with a predominance of Ultra High Modulus fibers for a unique weight to stiffness ratio, whilst every shape, wall thickness and junction is molded to enhance the bike's dynamic qualities and lifespan. It is a handcrafted, sophisticated process that results in the fastest racing bike LOOK Cycle has ever produced.

COMBO AERO HANDLEBAR

LOOK

LOOK

A born racer

The 795 Blade^{RS} geometry is tailored for competition, optimizing the rider's position for aerodynamics and maximum power transfer. The bike is exceptionally stable at high speeds and offers flawless handling. Though it is unapologetically aggressive, adjustment options are numerous to answer the needs of different types of cyclists. Featuring full integration, the ergonomics of the frame and components allow you to fine-tune your riding position, whilst the clever handlebar and stem combo make changing the stem length or handlebar width particularly easy. A key asset to make the most of the 795 Blade^{RS}' impressive dynamic qualities.

A professional cyclist is the central focus, wearing a white helmet with 'EKOI' branding, sunglasses, and a red and white cycling jersey. The jersey prominently features the 'Cofidis' logo in large white letters on the red front panel. Other logos on the jersey include 'UCI WORLD TEAM', 'LOOK', 'EKOI', and 'VAN RYSEL'. The cyclist's arms are raised in a celebratory gesture, wearing black gloves with a white sunburst logo. The background is a blurred outdoor setting with other cyclists in blue and white gear, suggesting a race environment.

Built to win

The professional riders of the Cofidis cycling team were instrumental throughout the development process, helping us fine-tune every aspect of the 795 Blade^{RS} to meet the demands of top-level racing: power transfer, vibration absorption, stiffness and responsiveness. Hours of testing on the road and in the wind tunnel with precise data led us to the best carbon layup and the right geometry choices. The result? A race-optimized machine that delivers a unique riding feel and top-end performance, whether you're sprinting at 70 km/h, working hard in the early break or attacking at the top of a mountain pass.

795 Blade^{RS}

- + Exceptionally lightweight: just 7 kg for a fully-built, race-ready bike.
- + Aerodynamically-efficient across the board to meet the demands of high-level racing and ensure perfect handling in windy conditions.
- + Carbon frame with a meticulous layup using Ultra High Modulus fiber for outstanding dynamic performance: optimized responsiveness, efficiency and comfort.
- + Proven at the highest level: the 795 Blade^{RS} is designed for the Cofidis Team riders and has already won on the UCI World Tour.
