KEO 2 MAX
CARBON

RIDE AT YOUR BEST

HISTORY

LOOK, INVENTOR AND MANUFACTURER OF THE CLIPLESS PEDAL, INTRODUCES THE NEW KEO 2 MAX CARBON.

Since 1983, when LOOK invented the first clipless pedal, we have constantly innovated to design and propose, to all cyclists, regardless of their level, an exceptional and reliable clipless pedal.

Launched in 2009, the KEO 2 MAX demonstrated its full potential by winning the Tour de France with Alberto Contador the same year. The objectives of the evolution and improvements made to this benchmark model was therefore an ambitious task for the LOOK design team since the previous version was already very impressive.

Dedicated to all cyclists in search of excitement and the desire to continually excel, the new KEO 2 MAX CARBON, notably used by Laurent Jalabert for the 2017 LOOK Marmotte Hochkönig, is innovative and benefits from all the LOOK engineers' expertise and know-how.

PER- FOR- MANANCE

KEO 2 MAX CARBON

THE NEW KEO 2 MAX IS THE PRODUCT THAT WILL GIVE YOU THE CONFIDENCE YOU NEED TO GO BEYOND YOUR PERSONAL LIMITS.

OPTIMIZED CONTACT SURFACE

The pedal's surface area has substantial symbolic importance. It is part of the brand's identity and acts as an indelible signature on the product.

The contact surface of the new KEO 2 MAX preserves the strong lines on which its history was built. Its width has been increased to 60 mm to provide a larger platform and improved foot stability during pedaling. This creates a feeling of unrivaled comfort not found in any other pedal.

We also sought to optimize power transfer thanks to its new 500 mm² of usable surface (+25% increase). The shape of the stainless-steel plate has been revised to match that of the cleat and to keep, regardless of the position of your foot (depending upon the angular float you use), the same amount of contact for consistent performance.

Increasing the pedal's usable contact surface, without any additional weight gain, improves the Power to Weight ratio, making the product even better and allowing you to perform at your best.

IMPROVED SPINDLE PROFILE

The spindle profile of the new KEO 2 MAX has also been optimized. Built around an oversized «Chromoly Plus» steel axle, it is composed of an axle with an inner ball bearing and a needle roller bearing, located under the contact surface, to handle the load and distribute it optimally.

A new component has been added between these two bearings. A serrated washer, previously used to hold the needle roller bearing in place, has been replaced with a conical spacer. This technical solution reduces friction, increases fluidity, and by consequence, decreases the geometrical tolerances of the pedal body and play.

The sole purpose of the sum of these improvements has been to guarantee you irreproachable reliability.

FOR YOUR INFORMATION

Weighing only 125g, the KEO 2 MAX CARBON is one of the lightest pedals in its category. This has been achieved thanks to the use of injected carbon that reduces its weight and improves rigidity.

FEATURES / CARACTERISTIQUES

TECHNOLOGY / TECHNOLOGIE	SPRING / RESSORT
TENSION	8 or 12
BODY / CORPS	CARBON
SPINDLE / AXE	CHROMOLY +
PLATFORM MATERIAL / MATIERE SURFACE D'APPUI	STAINLESS STEEL / INOX
PLATFORM AREA / SURFACE D'APPUI	500 mm ²
PLATFORM WIDTH / LARGEUR D'APPUI	60 mm
STACK HEIGHT + CLEATS / HAUTEUR D'APPUI + CALES	17,3 mm
WEIGHT PEDAL / POIDS	125 g
WEIGHT PAIR + CLEATS / POIDS PAIRE + CALES	312 g
RECOMMENDED MANUFACTURER'S SUGGESTED RETAIL PRICE <small>Available in authorized LOOK points of sale in July 2017</small>	99,90 €

Laurent JALABERT

"I love the stability and comfort the new KEO 2 MAX CARBON gives me. It feels like an extension of my feet, so I am one with my bike. When you are meticulous, like I am, this kind of detail really matters."
